SUMMARY

Fullstack developer offers expertise across HTML, CSS, JavaScript, React, Node.js, and Agile/Scrum methodologies to take user experience to the next level. I have a passion for creating visually appealing and user-friendly applications that demonstrate a commitment to excellence. Highly self-motivated with a desire to learn and grow as a developer and understand the latest trends and best practices in software development. Let's build the future together.

PROJECT EXPERIENCE

TASK PRO   GitHub (Front End)   GitHub (Back End)   Collaborative Team Project
Role: Full Stack Developer.
Technologies: React • Redux • Axios • SASS • REST API • Parcel • Node.js
• Key backend developer for TaskPro, responsible for user login/registration, Cloudinary setup for backgrounds, and integration of Google OAuth. On the front end, implemented Google OAuth and few components.

FINANCE   GitHub   Collaborative Team Project
Role: Front-end Developer
Technologies: React • Redux • Axios • SASS • REST API • Parcel
• Key contributor to a finance application empowering users to strategize savings for property acquisitions. Spearheaded the execution of the header for navigation, and created essential modal components to enhance user interaction and facilitate informed decision-making.

COCKTAILS   GitHub   Collaborative Team Project
Role: Front-end Developer
Technologies: HTML • SASS • JavaScript • REST API • AJAX • Parcel
• Developed a website featuring cocktail recipes with a modern design and responsive layout. Spearheaded the development of all modal windows in the application, enabling users to access detailed cocktail recipes.

FOODSTA   GitHub   Collaborative Team Project
Role: Front-end Developer
Technologies: HTML • SASS • JavaScript • Parcel
• Took part in developing a visit card website for a food delivery service, highlighting services, menu samples, and subscription options with a modern, responsive design. Took charge of the subscription section, enabling seamless user expression of interest in business services.

WEB STUDIO   GitHub   Personal pet project.
Role: Front-end Developer
Technologies: HTML • CSS • SASS • BEM • JavaScript
• Developed a professional visit card website for a web studio, showcasing services, completed projects, and contact information with a sleek, modern design, smooth navigation, and responsive layout
